

2014 Howard University Undergraduate Graduating Student Exit Survey

All Schools and Colleges

Description

The *Howard University Undergraduate Graduating Student Exit Survey* is administered annually to prospective candidates for graduation enrolled in all undergraduate programs. The primary purpose of the survey is to obtain information about students' satisfaction with a range of academic and co-academic experiences during their matriculation and to inquire about their plans for the future. The survey was administered by the Office of Institutional Assessment and Evaluation (OIAE) through a web-based format with the assistance and cooperation of faculty and staff in the various schools and colleges. The results are divided into six broad categories: demographics, school/college assessment data, student quality of life data, university community experience data, post graduation and student comments. There were 781 respondents.

EXECUTIVE SUMMARY

The *Howard University Undergraduate Graduating Student Exit Survey* is administered annually to prospective candidates for graduation who are enrolled in all of the University's undergraduate programs. The primary purpose of the survey is twofold: (1) to obtain information about students' satisfaction with a range of academic and co-academic experiences during their matriculation at the University, and (2) to inquire about their plans for the future. The survey is administered by the Office of Institutional Assessment and Evaluation (OIAE) through a web-based format with the assistance and cooperation of faculty and staff in the various schools and colleges. The presentation of the results of the survey is divided into six broad categories: demographics, school/college assessment data, student quality of life data, university community experience data, post-graduation and student comments. Student comments are included in the Appendix. There were 781 respondents.

The following sections contain the highlights from the data that were collected from the 2014 class of prospective graduates.

Demographics: *Who are the Members of the Undergraduate Class of 2014?*

The ratio of females to males is almost 3 to 1 with females and males representing 74.6% and 25.4% of the respondents, respectively. The two largest ethnic groups are African Americans (83.4%) and Africans (6.3%). No American Indian/Alaska Natives responded to the survey. Approximately 85.7% of the respondents either worked full-time or part-time while in school. Interestingly, 8.7% (68) of students work full-time on campus. While the majority (73%) of the prospective graduates earned their degrees in 4 years or less, 19.7% took five years to earn a degree after entering Howard. Also, less than one-fifth (19.3%) of the respondents were transfer students and nearly 38% of them are the first in their family to attend college. About 10% of the respondents have missed one or more semesters since they first enrolled in Howard University. Since the definition of the "graduation rate" as calculated by the Department of Education excludes students who "stop out" for at one semester, it is important to try to minimize the percentage of students who "stop out".

School/College Data: *How Satisfied Were They with their Educational Experiences?*

Approximately 78% of the students indicated that they were very satisfied or satisfied with the overall quality of their educational experience at Howard. Slightly fewer, 72%, were very satisfied or satisfied that the educational experience met their expectations. Graduates were also asked to rate the performance of personnel in their school or college: dean, depart chair, school/college administrative staff, departmental office staff, and faculty. The department staff received the highest satisfaction rating of 83.3%, and faculty with a close second highest rating of 82.3%. The largest area of dissatisfaction was related to customer service in the administrative offices of their school or college – almost forty percent (43%) of the respondents were dissatisfied or very dissatisfied.

Academic Advising. Students were asked to indicate their level of satisfaction with various aspects of academic advising. Nearly seventy percent, 69.0%, of the respondents were very satisfied or satisfied with the availability of academic advisors; while just over half, 53.4% felt that way about access to mentoring. It is also interesting to note that respondents were more satisfied with junior/senior year academic advising (68%) than with freshman/sophomore year academic advising (48.4%). Research suggests that effective academic advising during the early years can lead to increases in students' satisfaction with their overall educational experience and in institutional retention and graduation rates.

Knowledge and Skill Development. Students were asked to indicate their level of satisfaction for 21 knowledge and skill areas. The top three areas of development that prospective graduates were most satisfied with were: the ability to demonstrate leadership (93.3%), team work skill development (91.0%), and development of interpersonal skills (93.0%). The ability to demonstrate leadership is first for the three years – 2010, 2011 and 2013 and it was the area that received the highest rating under “very satisfied” (41.5%) and the lowest rating under “very dissatisfied” (1.3%). On the other, the three lowest areas of development (but still relatively high in absolute terms) were: knowledge of global policies and issues (72.0%), knowledge of the physical sciences (70.0%), and knowledge of mathematics (65.0%).

Student Quality of Life Data: *What are Students' Perceptions of Institutional Support Services?*

There are some offices with which students are unfamiliar. When students were asked to rate their level of satisfaction for several institutional support offices, at least thirty percent, nearly one-third of the students marked “Don't Know” for the following offices: Office of International Students (38.6%), Office of Student Special Services (33.2%), and the University Counseling Service (34.1%). The students were most dissatisfied with the Office of Financial Aid (56.4%) and the Office of Student Financial Services (48.3%). This is the fourth consecutive year that the Office of Financial Aid has received this distinction.

University Community Experience Data: *What are Students' Perception of Institutional Administrative Offices?*

Almost forty percent of the students reported that they were satisfied with the Office of the President (40.3%) and the Office of the Provost (38.0%). One reason for this level of satisfaction could be when it comes to the Offices of the President and the Provost students marked “Don't Know” at the rate of 26.0% and 31.4%, respectively. Information and ancillary services that received a “dissatisfaction” rating of at least 30% include: computer system of the University libraries (46.3%), availability of copying/duplication services (51.2%), wireless access to internet on campus (61.4%), on-campus housing process/management (45.5%), shuttle bus services (35.3%), cost of campus food services (52.3%), variety of food choices (e.g., vegetarian, etc.) (48.4%), BANNER Bisonweb registration system (46.3%) and quality of campus food services (48.6%).

The survey results also reveal areas where Howard may be able to expand and improve program experiences for students. For example, only 1.5% of students had experienced distance learning and only 4.2% had been involved in service learning. Also, half of the students (46.7%) had not engaged in any undergraduate research project; however, 25.5% of the students had attended a professional conference, 21.4% had presented research findings at a professional conference, and 8.8% had published research. Howard University students are also very community oriented with 63.6% having spent some time in community service; 60.7% in an internship and nearly fifteen percent (14.2%) in inter-disciplinary courses. Students also indicated a need to upgrade physical facilities, including classrooms, libraries, laboratories, residence halls, and physical fitness facilities. Approximately 17.2% are “very satisfied or satisfied” with the availability of parking.

Post-Graduation

Students were asked about their post-graduation plans and their relationship with Howard as alumna/alumnus. About eight-three percent of the students indicated that they plan to give back to Howard in some way. Among the 83.0% who plan to give back, 31.4% plan to make financial contribution while 23.6% plan to recruit new students. Nearly one-third of the respondents (31.0%) were able to report the salary range that they expected to be in after graduation. Among respondents, 29.9% had no plans to work and 53.8% were planning to pursue graduate/professional studies.

Demographic Data: Profile
