National Science Foundation

"No pandemic, no declining economy, no period of prosperity, and no cure for every medical ailment will undo or hide the realities of the Black experience. We must bring consistency to that struggle and focus our intellect and passion daily to prepare for the hard work that must be done to confront evil and systemic oppression.

Students must remain vigilant about their studies. They are matriculating though Howard University for a purpose that is greater than themselves."

- President Wayne A.I. Frederick
