Experiential learning encompasses the process of actively reflecting on learning by doing and is concerned with concrete issues related to the learner, and the contextual learning space. The University is dedicated to ensuring that our students have at least one experiential learning opportunity prior to graduating. Doing so broadens one's academic development by the transfer of knowledge gained in the classroom to adaptable, applicable, and practical situations. This can be accomplished through independent research, internships, and service learning.

According to the National Joint Committee on Learning Disabilities, learning disabilities is a "general term that refers to a heterogeneous group of disorders manifested by significant difficulties in the acquisition and use of listening, speaking, reading, writing, reasoning, or mathematical abilities." A learning disability is presumably due to central nervous system dysfunction and is not primarily due to other handicapping conditions, environmental, or cultural influences. It is not a form of mental retardation or an emotional disorder.

According to the above definition, does your institution accept learning disabled (LD) students?

Yes

Check <u>ONE</u> type that describes your institution's LD Programs

Structured/Proactive/Comprehensive program - Program has separate admissions process and charges fees. Services go well beyond those that are legally mandated and the student is provided with a more structured environment. Low staff/student ratios. Compulsory student attendance. An advisor/advocate is made available to students. ◉

Self-directed/decentralized services - There is no separate admissions process and eligibility for services must be established by the provision of disability documentation that meets institutional standards. Services may be coordinated through the Disability Services office and are based on need as specified by the documentation. Other offices throughout the campus may also provide services and some services offered are not mandated by laws. Students' progress is not monitored. ○

Compliance - Most of the services and accommodations that are provided to students with learning disabilities are those required by law. This type of program can meet the needs of independent students, aware of their needs and able to develop and coordinate their own support systems. ○
