

# EvaluationKIT and Browser Cookies

Emails sent from the EvaluationKIT system are sent from the EvaluationKIT email server.

- EvaluationKIT requires the acceptance of a session cookie by your browser software.
- The session cookie is used to ensure that you and only you can access information within the system. This session cookie is NOT stored permanently on your computer and will be removed when you close your browser.
- If you are seeing a message indicating the system has been unable to create a session cookie in your browser, this may be because cookies are disabled in your browser or cookies are enabled, but third-party cookies are disabled.
- The below instructions will walk you through checking/enabling browser cookies as is needed to use EvaluationKIT.

## IPHONE AND IPAD

**iPhone** and **iPad** default cookies settings are set to **Allow from Websites I Visit**, which prevents third-party cookies from being saved on your system.

To enable third-party cookies:

1. On your iPhone or iPad, go to **Settings**.
2. Select **Safari**.
3. Under **Privacy & Security**, disable **Block All Cookies** and **Prevent cross-site tracking**.
4. You may need to restart **Safari** for the new settings to take effect.

## SAFARI

Safari default cookies setting does not allow third-party cookies to be saved on your system. To enable third-party cookies:

1. From the **Safari** menu, click **Preferences**.
2. Select the **Privacy** tab from the top navigation.
3. Deselect **Block all cookies** and **Website tracking: Prevent cross-site tracking**.
4. You may need to restart Safari for the new settings to take effect.

## GOOGLE CHROME

**Google Chrome** allows 3rd party cookies by default. If you changed the default settings, you will need to revert to enabling all cookies by following the below steps:

1. On Windows, click the **Chrome** menu icon in the upper-right corner of the browser. Or on Mac, from the **Chrome** menu, click **Preferences**.
2. Select **Settings**.
3. Show or expand **Advanced** settings.
4. Go to **Privacy and security >Cookies and other site data**.
5. Enable **Allow all cookies**.

## MOZILLA FIREFOX

By default, **Firefox** privacy settings are set to **Remember history**, which allows 3rd party cookies. If you changed the default settings to either **Never remember history** or **Use custom settings for history**, you will need to revert to enabling all cookies by following the steps below:

1. On Windows, click the **Firefox** menu icon, or button. Or on Mac, from the **Firefox** menu, click **Preferences**.
2. Click **Content Blocking**.
3. Click on the **Privacy & Security**.
4. In the **Enhanced Tracking Protection** section, select **Standard**.
5. Click **OK**. You may need to restart Firefox for the changes to take effect.

## INTERNET EXPLORER

**Internet Explorer** allows 3rd party cookies by default. If you changed the default settings, you will need to revert to enabling all cookies by following the below steps:

1. Click the **Internet Explorer settings icon** in the upper-right corner of the browser.
2. Click **Internet Options**.
3. Click on the **Privacy** tab.
4. Slide the bar down to **Medium** in the **Settings** section.
5. Click **OK**. You may need to restart **Internet Explorer** for the changes to take effect.

## MICROSOFT EDGE

**Microsoft Edge** is set to not block cookies by default. If you changed the default settings, you will need to revert to enabling all cookies by following the below steps:

1. Click the **Microsoft Edge settings icon (...)**.
2. Select **Settings**.
3. Click **Privacy and Security**.
4. Under **Cookies**, click the drop-down menu and select **Don't Block Cookies**.
